# ONBOARDING

Based on your requirements and business processes, we will teach you how to set up the software environment, or we will do the job for you and provide support to your local IT manager/team to answer Altium-specific questions.

We train your designated colleagues in the basics of license and user management, installation and the software update process. Experience the fastest startup process with our software setup services as you migrate your engineering team to Altium Designer. With Altium 365 and Workspace setup, you will receive our suggested preferences, settings, and more.

## Our Software Setup Service covers the following topics:

- Installation of software environment
- Setup of basic parameters such as units, shortcuts and templates
- Analysis of team structure and recommended processes using Altium Designer
- Licensing setup with assignments to roles and users
- Definition of Altium preferences for the entire team to deliver unified outputs
- Recommendation of the best component libraries structure for team needs
